Professional Summary

Junior Cloud, DevOps, and MLOps Engineer with hands-on experience in AWS, Docker, Kubernetes, and CI/CD automation. Skilled in building scalable cloud-native infrastructure, optimizing ML workflows, and improving system performance, reliability, and deployment efficiency across cybersecurity and distributed application environments.

Technical Skills

- **Cloud & DevOps:** AWS (EC2, S3, VPC, IAM, CloudFront, CloudWatch, SNS), Docker, Kubernetes, Terraform, CI/CD, GitHub Actions, AWS CodePipeline, CodeBuild, CodeDeploy
- **Programming & Automation:** Python Automation, Git, GitHub, Linux (Ubuntu), Bash, SQL, REST APIs
- **Machine Learning & MLOps:** Feature Engineering, ML Workflow Optimization, MLOps Pipelines, Model Validation, Workflow Orchestration
- **Cybersecurity & Threat Intelligence:** Phishing Detection, RDAP/WHOIS, SSL/TLS, Threat Intelligence
- **Tools & Platforms:** Jupyter, VS Code, Postman, High-Performance Server Environments

Experience

- Software Trainee – DevOps & ML Engineering Oct 2025 – Present InfoShare Soft Solutions - Hyderabad
- Built and automated **AWS CI/CD pipelines** using CodePipeline, CodeBuild, and CodeDeploy, reducing deployment effort by **70%**.
 - Containerized **backend and ML services** with Docker and deployed scalable Kubernetes workloads with auto-scaling, ensuring **99.9% uptime**.
 - Optimized **cloud infrastructure and ML workflows** through EC2 rightsizing and modular pipeline orchestration, reducing execution overhead by **40%**.
 - Processed and analyzed **1300+ suspicious domains** using ML-assisted phishing intelligence, DNS/RDAP enrichment, and automated validation pipelines, improving performance by nearly **3x**.
 - Provisioned scalable **AWS infrastructure** using Terraform and configured **CloudWatch, CloudFront, and SNS monitoring**, reducing MTTR by **50%**.

Projects

Phishing Detection Pipeline

Python, XGBoost, Docker, MLOps

- Built scalable **MLOps workflows** for phishing detection using threat ingestion, feature engineering, and ML-based validation pipelines.
- Implemented **PU Learning** and **Random Forest** models for highly imbalanced phishing classification workloads, improving validation accuracy and detection reliability by **25%**.
- Optimized **DNS/RDAP enrichment pipelines**, achieving nearly **3x faster processing** for large-scale domain analysis.
- Reduced workflow overhead by **40%** through pipeline orchestration and execution optimization.
- Processed **2.5+ Crore suspicious domains** through automated ML validation and cybersecurity analysis pipelines.

AWS CI/CD Automation – Voucher Redemption Execution System

AWS, Terraform, GitHub

- Built end-to-end **CI/CD pipelines** with **AWS CodePipeline**, reducing deployment effort by **85%**.
- Provisioned scalable **Terraform IaC modules**, ensuring **100% configuration consistency** across environments.
- Optimized cloud resources using **S3 lifecycle policies** and instance rightsizing, reducing operational costs by **30%**.
- Implemented **blue-green deployments** with **AWS CodeDeploy**, ensuring **99.9% application availability**.
- Integrated **CloudWatch** and **SNS alerting**, reducing incident resolution time by **40%**.

Cloud-Native Microservices Orchestration Platform

Docker, Kubernetes, AWS

- Deployed scalable **microservices applications** using **Docker** and **Kubernetes** on AWS infrastructure.
- Configured **Kubernetes Deployments, Services, and Ingress** for secure and highly available application delivery.
- Implemented **Horizontal Pod Autoscaling (HPA)**, reducing infrastructure resource waste by **35%**.
- Automated **CI/CD pipelines** using **GitHub Actions**, reducing release cycles by **60%**.
- Provisioned highly available **AWS EKS clusters** using **Terraform IaC** for version-controlled deployments.

Education

Bachelor of Technology – Computer Science

Nov 2021 – Sep 2025

Sri Indu Institute of Engineering and Technology, Hyderabad

Intermediate (MPC)

Jun 2019 – Mar 2021

Prathibha Junior College, Mahabubnagar

Achievements

- Presented **ML pipeline milestones** and phishing intelligence workflow optimizations at **IIT Delhi** under the **NCIIPC AI Grand Challenge**.
- Contributed to cybersecurity-focused **MLOps infrastructure** for scalable phishing detection and real-time threat intelligence systems.
